Art Unit: 2653

The drawings are objected to because fig 5 must be filed a request for "drawing correction". A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claims 7-9, 16-18, and 25-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are drawn to a contradictory limitations such as a "play-back only type medium...allowed to be dubbed". If the medium is a read only then how could be dubbed?.

Further explanation is respectfully requested.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

a person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35

Art Unit: 2653

U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Ashe (6070799). Applicant's attention is drawn to figs 3 and 4. The reference shows an optical disk copying apparatus comprising a recording means 31, for recording data read from a first disk 30 to a second disk 34, judgment means to determine whether the first disk is allowed to be copied or not column 4 lines 19-21 and control means for inhibiting the data read from the first disk into the second disk based on the judgement means column 4 lines 24-26.

With respect to the limitations of claims 2, 5, 11, 14, 20 and 23. The reference is drawn to an optical disk such as a DVD and a CD-ROM.

With respect to the limitations of claims 3, 4, 6, 12, 13, 15, 21, 22 and 24. The reference discloses the use of an optical head (light beam) reflected from the disk during a reading operation 30 that read a predetermined information such as a disk ID (type), classification codes, and title meeting the claimed invention.

With respect to the limitations of claims 7-9, 16-18, and 25-27. The claims as far as proper and understood read on an alternative limitation between a CD-ROM and any other optical disk. The reference discloses the use of a CD-ROM or a DVD column 2 lines 1-6. The reference also discloses the use of an optical medium having a recording surface that is read with copy protection recorded thereon column 4 lines 20-31.
